

ORION Hand-held Pendant Controller

SPECIFICATIONS:

- Hand-held Programmable Pendant Controller
- 24 key membrane keypad and Back-lit LCD display
- Weight: 450 gram
- Programmable Engineering Parameters
 - (Speed, Acceleration, Deceleration, Machine Parameters)
- Programmable User Parameters
 - (Length, batch, relay timing, delays, restart options)
 - Totalizer
 - Recipe memory program settings
- Can be connected to multiple stepper motor drives with control cards simultaneously through RS-485 (Serial port) interface
- Ideal controller to program multiple motors individually
- Digital Inputs: Start and Stop sensors (More sensor inputs optional)
- Relay Outputs: 3 relay contacts (One more relay optional)
- Need not be connected to the machine all the time. Once the parameters are set, the controller can be detached.
- Compact, Reliable, and Versatile
